

4 January 2021

St George's School Windsor Castle are delighted to be working with Active IT Solutions. The ongoing support – both strategic and day-to-day – is outstanding and delivered by a highly competent and professional team. Our needs are met in a timely manner, and we feel very secure in the knowledge that the network is extremely well looked after.

Active IT have been responsible for many projects over the years, including: a new super-fast broadband line; upgrading of hardware across the site; roll-out of mobile technology and Google Classroom; installation of screens across the school site, and ongoing upgrades to our system and security.

The team have developed excellent relationships with the staff, who all feel very comfortable in approaching them for help at any time.

Security of our network is of paramount importance, and we know we have the very finest in the industry overseeing this for us.

I couldn't recommend Active IT more highly – they are the perfect IT partners for schools.

A handwritten signature in black ink, appearing to read 'W Goldsmith'.
